

T.H.C.S.D.-Talk

Volume 2 Issue 6

November 2014

From the Top

November. Reflection on the year past....the good, the bad, and the ugly! As many of you will recall, it was a year ago that T.H.C.S.D. went through some management changes! Obviously it was the best thing that could happen here! Time sure flies when you are having fun! And, we've been having a ball!

On the Political front

Opinion? Sure! Seems ironic the DEA would put California on enforcement notice! No sooner does that come, two raids in LA, one in Imperial Beach and four more closures at the beach! Yep – the DEA actually shot a warning shot this time....did you hear it? Now, on a more logical note. Why would California spend the \$\$ to put all the policies and procedures in place, when in 2016 we will legalize? I get that! But, it may mean that we will need to “close” the circle for a while and wait and see! T.H.C.S.D. doesn't like to piss off the DEA, so, we will NOT be taking any new patients for now.

Reminder!

Daylight Savings time! Check the hours of operation...we have scaled back into the light! Please do your best to keep us out of the dark! After all, that is when the creepy crawlies come out! Remember you can pre-order too if that helps!

Help Wanted!

Please contact us for further information. We are experiencing a large volume of seriously ill patients – please share your ideas of how we can get the product as high a quality for the lowest donation. It could be a matter of life or death! If you, or someone you know has trim, shake, flowers, etc. that you would like to donate to the RSO project, please let us know!

Just Chit-Chat

As you know, we have been doing two **Farmer's Markets** a week. Tuesday evening in Alpine and Sunday in Julian. Julian didn't go as planned. We never really got much attendance, and the organizer cancelled the events. Tuesday, with the **daylight savings time** has us in kind of a questionable place. Should we stay or should we go?? We're thinking maybe once a month!? Ideas? We have done an amazing job making the community of Alpine and Julian aware of the needs to support and encourage the hemp industry. Folks that, in their own words, “didn't have a clue” what this country has done to itself by not allowing it. We have been working with some of the big players trying to acquire seeds for our local farmers – fingers crossed!

On another note, we have started over on the **Reishi** project...more research reveals that we likely did not have the dosing correct....back to the drawing board!

Hello organic tea! Did I mention that I recently acquired a dozen different herbs for tea making...look for the addition on the menu! And, speaking of the menu...have you been paying attention? T.H.C.S.D. has done an incredible amount of “expanding” – we have more flower options, the addition of 3 more edibles, more CBD products will show as soon as they are commercially available....and what's missing? It goes back to the reflecting I mentioned earlier...we used to be so little, now??

Before I close this out, let me report the **RSO Project** is off the hook! We are being contacted by other Collectives/Dispensaries almost daily. Please, don't forget about this...it really is lifesaving! We are currently treating patients, and seeing the benefits right before our eyes!

As always, take care, be safe, and don't forget to check your fire alarms – it's time to change the clocks!

Be well,
Dabzz
